

MySurvey : survival guide in the clouds

1. Interface

2. Key Features

- **Site structure** : structure of the site. Each node represents a floor, with a map, and each sub node represents a viewpoint/station.
- **Groups Tab** : Group structure. All the objects of the user space are accessible in this tab.
- **Map view** (view the map and select stations – opens when clicking on the floor node on the site structure) :
 - o Select a station (to open a scanorama from the map) – left click on the dot representing the station on the map ;
 - o View the position of 3D objects on the map – right click and « Display on the map » ;
- **Panoramic view** (display the 360° view of a station – opens when clicking on a station in the site structure or in the map) :
 - o Measure (Tools « Free Segment », « Polygone », « Rectangle », « Cylinder »...) ;
 - o Annotation (Tools « Text », « Annotate », « Pictures ») ;
 - o Multiple views (Look and work on the same zone with different viewpoints (red and green)) – Right click on a station, then select the view to open ;
 - o 3D models import - « Système » menu, then « Import 3D models » ;
 - o Hybrid model – « 360° » button of the objects to display, or right clic + « Display in 360° view » ;
- **3D view** (allows to display the 3D view – click on the 3D button in the toolbar or display an object in the 3D) :
 - o Display 3D objects – 3D button of the objects to display, r right click + “Display in 3D view” ;
 - o Display imported models – 3D button of the models to display, or right click + “Display in 3D view” ;
