

- The import and export functions are subject to an appropriate license
- By selecting a group in the tree view of the main window, the corresponding property window displays an "Export" button.

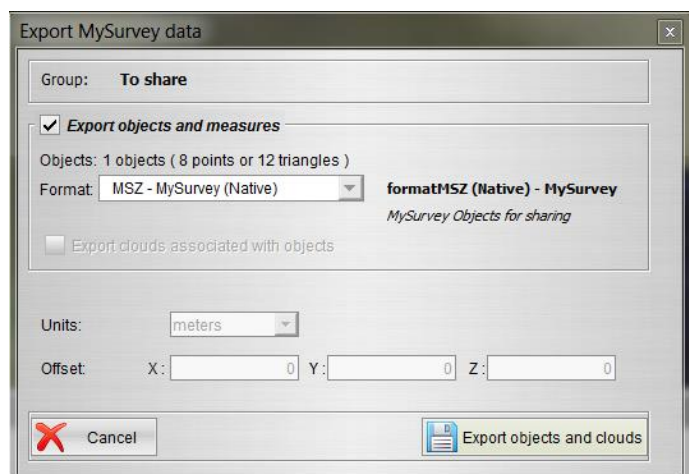

Selecting a group containing objects

Exporting

- This button will display a dialogue box allowing you to choose the export format. The default choice is the mySurvey format with the file extension "MSZ".

Only this format guarantees the compatibility of the objects during a subsequent import.

- d. You will then be prompted to specify the name and location of the exported file.

The export starts immediately even if no progress information is available at that moment.

The application remains inactive until the export is complete.

At the end of the export the format selection window disappears.
